

PALLET FORKS

HEAVY DUTY D-RING & WIDE FRAME

Our Blue Diamond® Tall Frame Heavy Duty pallet forks are rated for 6,000 lbs lift. Featuring a heavier frame than our standard height Heavy Duty frame, these forks bring a few additional benefits. A heavy D ring comes standard, as do a high-visibility back rest and steps on each side. The back rest on this frame is set forward so the face of the backrest is flush with the front of the tines below. With a massive bottom frame and bracing, these forks are ready for whatever you're lifting. They come standard with 48" or 60" adjustable tines.
