

ROCK & CONCRETE GRINDER

The Blue Diamond® Rock & Concrete Grinders are a must have tool for any application where rock, concrete, and asphalt need to be removed. They allow for a clean trench to be made with vertical walls. Four different models are available, and mounts to fit most excavators and skid steers.

Applications:

- Trenching
- Demolition
- Rock Excavation

FEATURES INCLUDE

- All American-made parts & components
- Powerful high torque hydraulic motors
- Robust cutting drums to ensure maximum production & prolonged life
- Customizable drums to accommodate performance maximized applications
- Durable spur gears & housing
- Bolt on mount for excavator or skid steer

Shown on excavator; skid steer mount available.
